

What a concept: Complete head-to-toe orthopedic care in each location.

Imagine a place where you can go for almost any orthopedic problem, be seen by an experienced physician — as well as a therapist, if necessary — and be treated without having to go anywhere else. That's precisely what we've created at The Rehabilitative & Orthopedic Centers of Indiana. Using a unique team approach, with an emphasis on non-surgical treatment, we provide comprehensive orthopedic care in each location. With little or no waiting. The staff includes highly respected orthopedic surgeons, nurses, physical and occupational therapists, as well as athletic trainers. So no matter what type of orthopedic problem you have, we'd be happy to discuss it with you. For an appointment call us toll-free at 877-366-BONE.

Highly Trained Orthopedic Surgeons: Dr. Martin Deafenbaugh is the former chief orthopedic surgeon at the National Naval Medical Center. Dr. Kevin Condict is an expert in the reverse total shoulder replacement, a unique procedure for patients with severe shoulder arthritis with a deficient rotator cuff. Additionally, both specialize in the areas of joint replacements (shoulder, hip, and knee), arthroscopic shoulder and knee reconstruction, sports medicine and general orthopedics.
